

# Bioethics and Drug Discovery

Interface Towards  
Saving Lives

*Guest Speaker :*

**Christina Gavegnano MS, PHD**

Assistant Professor

Department of Pathology (Primary)

Department of Pharmacology and Chemical Biology (Secondary)

Master's in Bioethics Candidate, Harvard Medical School

Dr. Gavegnano will speak about the role of bioethics across bench-to-bedside drug discovery, including in a pandemic setting. She will discuss her own bench-to-bedside success of baricitinib for treatment of viral infections, and the bioethical hurdles associated with worldwide approval of baricitinib for COVID-19.

**Thursday, February 24,  
4:00pm**

**Join us virtually!**
